MONTGOMERY COUNTY COVID-19 UPDATE

MONTGOMERY COUNTY – Montgomery County Public Health District, in conjunction with the Montgomery County Office of Emergency Management, can confirm Montgomery County’s third presumptive positive case of COVID-19. The man, who is in his 40s, resides in Northwest Montgomery County. His only travel is to the State of Florida.

Our other cases are:

- A woman, in her 40s, who resides in Southeast Montgomery County. Travel to New Orleans.
- A man, in his 40s, who resides in Northwest Montgomery County. Did not travel outside of Texas.

We have not yet received CDC confirmation on these cases. At this point, we are trying to mitigate the spread of this virus in the community. Today, Montgomery County Judge Mark Keough announced measures to limit large crowds. You can find the press release with those details below.

Non-pharmaceutical interventions like hand-washing, disinfecting surfaces around your home, and staying home when you are sick are the most important response strategies. At this time, there is no vaccine to protect against COVID-19, and no medications approved to treat it.

The Texas Department of State Health Services is urging health care professionals to ask patients with respiratory symptoms about their travel history and contact their local or regional health department if they think a patient may have COVID-19. DSHS is working with local health departments to monitor and assess people with recent, relevant travel history and others for possible COVID-19 testing.

All travelers who have returned from flagged countries should stay home and monitor themselves for symptoms for 14 days. They should consult with a health care provider if they develop fever, cough or shortness of breath within that period. Local health departments across the state are in contact daily with returned travelers to verify that they remain symptom-free.

Human coronaviruses most commonly spread from an infected person to others within about six feet through respiratory droplets released into the air by coughing and sneezing, close personal contact, such as touching or shaking hands; touching an object or surface with the virus on it, then touching your mouth, nose, or eyes before washing your hands; and rarely, fecal contamination.

Patients with confirmed 2019-nCoV infection have reportedly had mild to severe respiratory illness with symptoms of fever, cough, and/or shortness of breath. The CDC believes that symptoms of 2019-nCoV may appear in as few as 2 days or as long as 14 days after exposure.
If you are a healthcare provider, be on the lookout for people who have fever and respiratory symptoms. If you are a healthcare provider caring for a COVID-19 patient or a public health responder, please take care of yourself and follow recommended infection control procedures. If you have potentially been exposed to someone sick with COVID-19 in the last 14 days, you will face some limitations on your movement and activity. Cooperation is integral to the ongoing public health response to try to slow spread of this virus. If you develop COVID-19 symptoms, contact your healthcare provider, and tell them about your symptoms and your travel or exposure to a COVID-19 patient before arriving to seek medical care.

The best way to prevent infection is to take precautions to avoid exposure to this virus, which are similar to the precautions you take to avoid the flu.

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

FOR IMMEDIATE RELEASE:
March 12, 2020

The Office of County Judge Mark Keough along with the Office of Homeland Security and Emergency Management announce the following notice in lieu of recent events in Montgomery County. At 9 am this morning Judge Mark Keough signed a declaration of local disaster for Montgomery County in response to the current and anticipated needs to respond to the COVID-19 crisis. Additionally, Judge Keough has signed an order pursuant to Section 418.018(G), Texas Government Code that orders the following:

1. Any event sponsored or permitted by Montgomery County shall cease.
2. Events greater than 250 persons shall cease at all public facilities across Montgomery County.
3. Any event greater than 250 persons held at private facilities is urged to cancel but should make those determinations within their organizations and with staff of those facilities.
4. Events of 250 persons or more that would include any population at severe risk of severe illness should cease. The population at the greatest risk is anyone over the age at 65 and/or those with severe medical conditions as defined by CDC guidelines.
5. Nursing homes and senior living centers should limit visitation of the public within their facilities.

This order does NOT extend to law enforcement activities, emergency responses, court operations to include jury operations, and to all school districts or private school facilities within the jurisdiction of Montgomery County.

All Montgomery County Employees must report for work as required by their supervisors. Effective immediately and through the duration of this order, all Montgomery County employees shall cease any work related travel.
This order shall take effect at midnight on March 13, 2020 and extend for a duration of 30 days and may be extended as needed.
